

Capsule Endoscopy (Camera Pill)

Why Choose us?

1. Carried out by Gastroenterology Specialists
2. We can do it in your own home or in a clinic. No more worries about traveling with bowel preparation.
3. We will beat any other local quote
4. Payment plans available
5. Reviewed by a Specialist Gastroenterologist

Colon capsule provides:

- 1- A non-invasive way to look at your entire gastrointestinal tract
- 2- No pain
- 3- No effects from sedation
- 4- No radiation, which in itself is a cancer risk
- 5- No waiting list for endoscopy suite
- 6- No risk of perforation and associated stomas, especially with a history of diverticular disease (Schelde-Olesen et al., 2023)
- 7- No bleeding risks
- 8- No added risks with age
- 9- Good measurement of polyp size from the unique specialist software technology
- 10- Ability to see cancerous polyps missed by colonoscopy dilation (Colonoscopy has a 2.1-5% miss rate for significant cancers)(Than et Al., 2018)
- 11- A report made available in the same time frame or sooner than biopsy results from a colonoscopy
- 12- Better procedure completion rate compared with colonoscopy for abandonment due to pain
- 13- No major complications been reported with colon capsule endoscopy (BSG, 2021)
- 14- From national studies over 77% of patients would prefer colon capsule as follow ups rather than colonoscopy (Ismail et al., 2022)
